## Saved posts - do they expire?

I had a few posts (maybe 10) that I had saved - like election hearings and alike.

1 post however was a poster here who recently posted that they had ended up going to the police with their findings and also legal teams and if nothing was done with what they gave over they would post here.

I wanted to revisit it. I think they said they would come back 19th? I dont remember!

Anyway- nearly all my save posts have disappeared. No more than 2 months old any of them. Do they expire?

▼ Thats annoying! But I understand.

I WISH I screen shot the post in that case.

He seemed a legit poster with great post history. Don't quote me, but he had find some kind of code in one of the swing states? Originally had asked for help working it all out and another pede was a real help!

They ended up turning it all in and promised if nothing came of it they would drop it here.

Im super annoyed at myself! I hope someone else remembers it :)

 Mods cleaned up the servers for security reasons. So some posts got deleted if they were a month or older maybe even 2 weeks.[permalink](#) [save](#) [report](#) [block](#) [reply](#)
